**You must establish/validate a SAS Certification Manager account BEFORE the scheduled SAS Testing Event.**

This MUST be done at least 5 days before the event. You do not need to select your exam before the testing event.

Step – 1 To create or verify access to your SAS Certification Manager account visit www.certmetrics.com/SAS and follow the detailed instructions on the login page.* Be sure to complete your Profile information (including phone number) and Opt-in status as prompted.

Step – 2 Upon creation of your account, finalize your settings, complete your log in and click on **"Schedule/Modify Exam Appointment"** on the SAS Certification Manager **HOME** page.

IMPORTANT: If you do not connect to Pearson VUE your information will not be passed over and may cause delays on Test Day.

If connection to Pearson VUE is successful, you have nothing more to do until test day. If you receive any type of error when trying to sign in to Pearson VUE, follow the onscreen prompts to correct your Profile information, then repeat Step 2 until you successfully log in.

You will need to remember the email and password you create for your SAS Certification Manager account. This is what you will use for all future SAS exams taken at either a Pearson VUE testing center or a SAS Testing Event.

Please note, this is a new process as of August 18, 2018. As of this date, you will no longer use your Pearson VUE login credentials to access or schedule exams.
